

DARPAN DHANDE

+91-9890643701 | darpandhande@email.com | GitHub | LinkedIn | 📍 Pune, India

Professional Summary

Data Science and Analytics professional with hands-on experience in Python, SQL, data analysis, exploratory data analysis (EDA), machine learning, and predictive modeling. Proficient in Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, MySQL, Excel, and Power BI. Experienced in data preprocessing, feature engineering, regression, classification, model evaluation, data visualization, and machine learning model deployment. Developed end-to-end machine learning projects involving house price prediction, employee leave prediction, and student performance prediction. Seeking opportunities in Data Analytics, Data Science, or Machine Learning to apply analytical and technical skills to real-world business problems.

Technical Skills

Programming Languages:	Python (Core & Advanced), SQL
Data Analysis:	Pandas, NumPy, Matplotlib, Seaborn, Data Cleaning, EDA, Data Visualization
Machine Learning / NLP:	Predictive Modeling, Regression Algorithms, Natural Language Processing (NLP), Data Preprocessing, Feature Engineering, Model Evaluation, Hyperparameter Tuning
Tools & Platforms:	GitHub, VS Code, Jupyter Notebook, MS Excel, Power BI, Scikit-learn
Deployment / Cloud:	Vercel, Render, Streamlit, AWS
Soft Skills:	Communication, Teamwork, Problem Solving, Analytical Thinking, Time Management

Education

Shree Sant Gadge Baba College Of Engineering & Technology

B.Tech in Artificial Intelligence & Data Science (AI & DS)

Aug 2023 – Aug 2026

Bhusawal, Maharashtra

Cloudblitiz

Data Science & Analytics

Apr 2026 – Present

Pune

- Working on data preprocessing, EDA, data visualization, and data analysis using Python, Pandas, NumPy, and SQL to derive actionable insights.
- Applying machine learning and statistical techniques to analyze patterns, develop predictive models, and support data-driven decision-making.

Projects

House Price Prediction System

GitHub

Python, Machine Learning, Random Forest, Scikit-learn

- Developed a Random Forest regression model to predict house prices using property features including location, area, number of bedrooms, and other relevant attributes.
- Performed data preprocessing, exploratory data analysis (EDA), feature engineering, model training, and evaluation to improve prediction performance and data quality.
- Applied model evaluation techniques and feature analysis to identify key factors influencing house prices and generate reliable price predictions.

Employees Leave Prediction

GitHub

Python, Machine Learning, Logistic Regression, Scikit-learn

- Developed a machine learning classification system using Logistic Regression to predict whether an employee is likely to take leave based on relevant employee attributes.
- Performed data preprocessing, exploratory data analysis, feature engineering, model training, and model evaluation to improve classification performance.
- Integrated the trained machine learning model into a web application and deployed it on Vercel, enabling users to generate real-time employee leave predictions.

Student Result Prediction System

GitHub

Python, Machine Learning, Scikit-learn, Pandas

- Developed a machine learning-based prediction system to predict student academic performance using relevant academic and demographic features.
- Performed data cleaning, preprocessing, exploratory data analysis (EDA), feature engineering, model training, and evaluation to prepare data and improve prediction performance.
- Analyzed student-related features and model predictions to identify factors associated with academic performance and support data-driven academic insights.
